

Component Capability List

Of “A-Technics”

Issue **10** dated **27.03.2020**

Revision highlights:

- **Addition of C4/C8/C20 ratings for structure and composite repairs at SVO airport.**

Airport Vnukovo (VKO), Airport Sheremetyevo (SVO), Moscow:

Rating	ATA	P/N	Designation	CMM Reference	Level of Maintenance	Work Shop
C4 Doors – Hatches	52-00-00 52-92-11	Airbus A318/319/320/321	Note 4	N/R	Repair: Major and minor structural repair as specified in the AMM, SRM and manufacturer's drawings.	Structure and composite repair Shop
	52-00-00 – 52-80-90	B747-400				
C6 Equipment	25	17KH()T()()()JD, 17KH()Z()()()JD	AVIOINTERIORS	25-27-62	Inspection/Testing/Repair	Seat Workshop
		13EJ()T()()()VD, 13EJ()Z()()()VD	AVIOINTERIORS	25-27-73		
		13HS()T()()()VD, 13HS()Z()()()VD	AVIOINTERIORS	25-27-73		
		13EK()T()()()VD, 13EK()Z()()()VD	AVIOINTERIORS	25-27-73		
		13XA()T()()()VD, 13XA()Z()()()VD	AVIOINTERIORS	25-27-73		
C8 Flight Controls	55-00-00 55-46-49	Airbus A318/319/320/321	Note 5	N/R	Repair: Major and minor structural repair as specified in the AMM, SRM and manufacturer's drawings.	Structure and composite repair Shop
	57-40-00 57-75-21		Note 3			
	55-00-00 – 55-40-90	B747-400	Note 5			
	57-43-02 – 57-70-90	Note 3				

Rating	ATA	P/N	Designation	CMM Reference	Level of Maintenance	Work Shop
C20 Structural	53-00-00 53-56-11	Airbus A318/319/320/321	Note 1	N/R	Repair: Major and minor structural repair as specified in the AMM, SRM and manufacturer's drawings.	Structure and composite repair Shop
	54-00-00 54-57-11		Note 2			
	57-00-00 57-31-23		Note 3			
C20 Structural	53-00-00 – 53-80-90	B747-400	Note 1	N/R	Repair: Major and minor structural repair as specified in the AMM, SRM and manufacturer's drawings.	Structure and composite repair Shop
	54-00-00 – 54-62-71		Note 2			
	57-10-01 – 57-30-90		Note 3			

Note 1: Fuselage Sections Skins, main structure, secondary structure, and fairings of the complete fuselage with any structural differences grouped together and highlighted by fuselage section location. The section locations shall be defined by manufacturing joints or other suitable demarcations in sequence from front to rear. Does not include movable partitions covered in Chapter ATA 25 nor the functional and maintenance aspects of variable aerodynamic fairings covered in ATA Chapter 27.

Note 2: Structural units and associated components and members which furnish a means of mounting and housing the power plant or rotor assembly. Includes skins, longerons, belt frames, stringers, clamshells, scuppers, doors, nacelle fillets, attach/attached fittings, etc. Also includes the structure of power plant cowling inclusive of the structural portion of the inlet whether or not integral with the aircraft. Structural portions of the exhaust system are excluded where they are not integral with the airframe.

Note 3: Wing Skins, primary structure, fillets, and fairings of the wing, and attach/attached fittings.

Note 4: Removable units used for entrance or exit, and for enclosing other structure contained within the fuselage. Includes passenger and crew doors, cargo doors, emergency exits, etc. Electrical and hydraulic systems associated with door control are included as appropriate.

Note 5: Horizontal and vertical stabilizers include the structure of the elevator and rudder.

TABLE FOR STRUCTURE AND COMPOSITE REPAIRS FOR BOEING 737NG AIRCRAFT UNDER C4/C8/C20 RATINGS (VKO, SVO)

NOTE: Text included into column “P/N” represents Boeing “drawing number” of the higher assembly. Asterisk (*) at the end of the drawing number represents the Boeing “dash number”, which may include several additional symbols for different variants of the same assembly. All sub-assemblies included into the relevant higher assembly drawing number are also considered included into approval ratings. The list was developed based on available customized documentation of A-Technics contracted operators (Boeing SRM, AIPC, drawings) valid at the date of development, therefore this list may not represent all the possible variations of all structure assemblies of Boeing 737NG aircraft. Additional part (drawing) numbers, falling under the same “Designation” and ATA chapter from Boeing 737NG SRM may be included into Capability list according to procedure, described in MOE 1.11.

NOTE: Text included into column “P/N” represents Boeing “drawing number” of the higher assembly. Asterisk (*) at the end of the drawing number represents the Boeing “dash number”, which may include several additional symbols for different variants of the same assembly. All sub-assemblies included into the relevant higher assembly drawing number are also considered included into approval ratings. The list was developed based on available customized documentation of A-Technics contracted operators (Boeing SRM, AIPC, drawings) valid at the date of development, therefore this list may not represent all the possible variations of all structure assemblies of Boeing 777 aircraft. Additional part (drawing) numbers, falling under the same “Designation” and ATA chapter from Boeing 777 SRM may be included into Capability list according to procedure, described in MOE 1.11.

Airport Orenburg, Orenburg maintenance base:
